

**World For All NGO: Advocating for Animal Welfare**

Between 2018 and 2019, I took an active role in my community to spread awareness about the importance of dog sterilization, partnering with the World For All NGO. Driven by a passion for animal welfare, I went door-to-door in my building and surrounding area, engaging with residents and raising awareness about the need for responsible pet care.

To amplify my efforts, I also launched a fundraising campaign on Ketto and created pamphlets and flyers to distribute throughout the community. Through persistent efforts, I managed to gather donations and spread crucial information, ultimately facilitating the sterilization of over 30 dogs in my area.

This initiative not only enhanced my understanding of community engagement but also instilled a deep sense of responsibility toward making a tangible impact on animal welfare.
